Alex Olejnik

Software Developer

Developer with over 3 years of experience in demanding environments — banking and public sector. Specialized in Java and PL/SQL, with a full-stack vision and currently incorporating artificial intelligence into the development workflow.

EXPERIENCE

Java / PL/SQL Developer

Hiberus Mar. 2023 — Present

- Development of public sector (AAPP) applications using Java and PL/SQL, report generation with JReport and integration with CEX.
- Creation of custom web pages using JSP interfaces.
- Use of artificial intelligence as an additional tool within the development workflow, a company-driven initiative.

Java PL/SQL JReport JSP CEX JIRA Postman AI

Back-End Java Developer

Capgemini 2021 — 2023

- Development of banking sector applications. Focus on Back-End Java and relational database management using agile methodologies.
- Maintenance of Java applications with Spring Boot, version control with GitLab and REST API testing.
