About Me

Developer with over 5 years of experience in demanding environments, banking and public sector. Specialized in Java and PL/SQL, with a full-stack vision and currently incorporating artificial intelligence into the development workflow.

EXPERIENCE

Java / PL/SQL Developer

Hiberus

Mar. 2023 — Present

- Development and integration of Java and PL/SQL based back-ends with CEX front-ends.
- Automatic PDF generation through custom templates using RedHat's JReport tool integrated with CEX.
- Development of custom JSP pages, including forms connected to a backend and database for data transfer and persistence.
- Use of artificial intelligence as an additional tool within the development workflow, a company-driven initiative.

- Java
- PL/SQL
